SCHEDULE OF PROPOSED ACTIONS

Medicine Bow-Routt National Forests Thunder Basin National Grassland

The attached Schedule of Proposed Actions (SOPA) is a list of projects that Forest personnel plan to work on during the next three months. The Schedule is updated on a quarterly basis, and changes are made depending upon funding and the priority of other projects on the Forest.

The purpose of the Schedule is to notify people, so that they can decide what projects they are interested in and whom to contact to request more information. Since the Schedule includes all active projects on the entire Forest, the information is general in nature. Therefore, anyone that is interested in learning more about a specific project or would like to submit comments, can call or write to the Contact Person that is listed for that project.

When individuals or groups inform the Contact Person that they are interested in a specific project, their name is added to a mailing list for sending out all future information related to that project, such as the Scoping letter, Environmental Assessment, and other NEPA documents. Public comments for individual projects are requested during formal Scoping, as identified on the Schedule. These comments are particularly helpful during the early stages of the analysis process when the Purpose and Need, public issues, and the extent of the overall analysis for that project are being developed.

Each project listed on this SOPA has a different mailing list comprised of individuals who have indicated an interest in that specific project. Mailing lists of individuals that are interested in “categories of projects,” such as timber harvest, livestock grazing, or road construction, are no longer maintained or used for automatically sending out notices of future project activities.

This Schedule is not a National Environmental Policy Act (NEPA) document, nor is it a solicitation for comments. Therefore, submitting comments related to the Schedule itself does not provide standing for Administrative Review (36 CFR, Parts 215, 217, 251) of any individual project. Standing for subsequent administrative appeal derives from an individual or organization submitting substantive written or oral comments during the 30-day formal comment period for an environmental assessment, or 45-day comment period for a draft environmental impact statement (§215.6, 40 CFR 1506.10; FSH 1909.15, Chapter 20) .

Two New Categorical Exclusion Categories

Adopted

The Forest Service recently added two new categorical exclusion categories to the toolbox of procedures available for implementing the National Environmental Policy Act (NEPA).

Categorical exclusions identify actions that do not individually or cumulatively have a significant effect on the human environment and therefore do not require the preparation of an environmental assessment or an environmental impact statement.

These new categorical exclusions (CE's) were published as proposals in the Federal Register on September 20, 2001. After making changes as a consequence of public comments, final forms of these CE's were published in the Federal Register on June 4, 2004.

The two new CE's are:

FSH 1909.15 - 31.12 (10) (*Categories for Which a Project or Case File and Decision Memo Are Not Required*)

10. Amendment to or replacement of an existing special use authorization that involves only administrative changes and does not involve changes in the authorized facilities or increases in the scope or intensity of authorized activities, or extensions to the term of authorization, when the applicant or holder is in full compliance with the terms and conditions of the special use authorization. Examples include but are not limited to:

a. Amending a special use authorization to reflect administrative changes such as adjustment to the land use fees, inclusion of non-discretionary environmental standards or updating a special use authorization to bring it into conformance with current laws or regulations (for example, new monitoring required by water quality standards).

b. Issuance of a new special use authorization to reflect administrative changes such as, a change of ownership or control of previously authorized facilities or activities, or conversion of the existing special use authorization to a new type of special use authorization (for example, converting a permit to a lease or easement).

„,and...

FSH 1909.15 - 31.2 (15) (*Categories of Actions for Which a Project or Case File and Decision Memo Are Required*)

15. Issuance of a new special use authorization for a new term to replace an existing or expired special use authorization when the only changes are administrative, there are no changes to the authorized facilities or increases in the scope or intensity of authorized activities, and the applicant or holder is in full compliance with the terms and conditions of the special use authorization.

These new categorical exclusions are designed to simplify analysis and documentation for routine special use authorizations involving only administrative changes.
